Sample Projects

-Tables : A third-party web application that uses set of libraries to connect all of user's social accounts such as Facebook, Twitter, and Google Plus into one platform.

-Booking Core : Booking Core is a booking bnb system based on Laravel / Vue / Vuex / SPA / REST / API , designed for a travel website, Marketplace, Travel Agency, Tour Operator, and Room Bnb. The application offers an opportunity to search for reservation across large number of hotels. You can also leave a review for your booking. The application also have a basket activated with payment methods in order to purchase one or more booking across various hotels.

-Social CMS : A Laravel application that gives the ability to authenticated users to create, manage, modify, and publish content (posts or media) in a user-friendly interface. Features such as Dropzone form, Ckeditor, Admin dashboard, Tracking online users, Users roles, etc.. are included in this project.
